

Dual-Core Mobile Application Processor

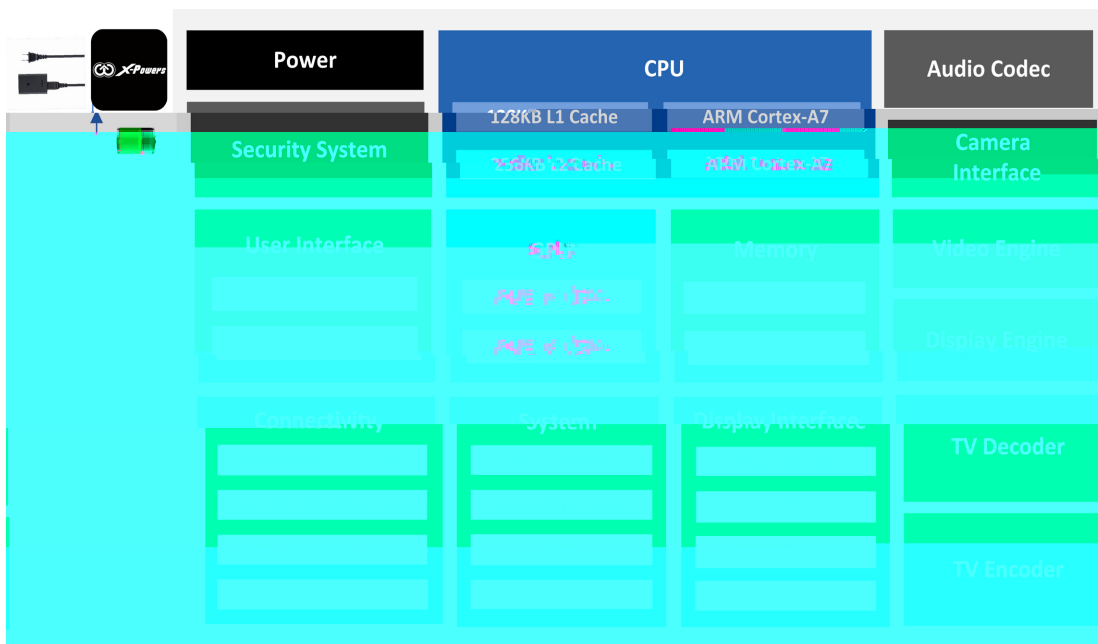

Multi-core performance is now a critical requirement of new consumer, home, and auto infotainment devices. As computing resource requirements increase, computing power must adapt in response. Applications like web-browsing, streaming video, gaming, and file sharing are growing in complexity as users require faster and more enjoyable content. Allwinner's A20 processor, a dual-core Cortex™-A7 system, delivers a multi-core solution for tablets, smart TV, IPTV, and portable devices that effectively balances system cost, performance, and power consumption.

Applications

The A20 processor is based on a dual-core ARM® Cortex™-A7 CPU architecture, the most energy efficient application processor from ARM

cycle and enables customers to directly upgrade already-mature single-core platforms directly to dual-core.
